Professor Moriarty

The last samurai by tom cruise was a cool movie. The movie stars tom cruise and tom cruise directs the movie too. The movie is about a western who goes to the japan and learns to appreciate the samurai. He becomes a samurai, than he fights his own people. Most of the movie, he spends a lot of time learning how to be a Samurai. He is takin under the wing of a master who teaching him how to be a true warrior. And, he falls in love with a girl whose husband was a samurai and who is now dead.

The movie had a real affect on me. Their were many good moments in the flick. For example I liked when tom cruises character learns to fight. I liked watching him get a good butt kicking when the samurai are training him. I think the movie helped to make a big impression on me. They're so many good movies which don't even come close.

Alot of the movie tom cruise spends fighting. Their is alot of violence in it. I think the movie deserves the rating of "R." All though I think the movie could be appreciated by families for the dramatic qualities. Do to the violence parents should watch it with their kids. This would be a good experience for them to get some culture. But do the write thing. Kids minds are fragile things.

I give it an A+. The passed should not be forgotten.
