- _____ obedient pet
- _____ older man
- _____ ointment
- _____ overachiever
- _____ overabundance
- _____ ozone hole
- _____ United Arab Emirates scholar
- _____ UEA delegate
- _____ utopian society
- _____ United States naval officer
- _____ UNIX guru
- _____ UTA bus driver
- _____ UVU professor

EXERCISE

Add A, AN, or THE when appropriate.

_____ atmosphere of _____ earth is composed of air. _____ weight of _____ air relates to our weather. Low pressure areas have less atmospheric mass while high pressure systems have more atmospheric mass. In other words, when you see _____ barometer, _____ instrument for measuring _____ atmospheric pressure of _____ area, and you have _____ high-pressure reading, then _____ weather is generally good. However, if _____ barometer has _____ low pressure reading, then _____ storm or some other form of severe weather may be approaching. On _____ barometer, _____ high pressure reading is generally 30.5 to 31+ while _____ low pressure reading is generally anything below 29.9. Strong storms such as hurricanes may have _____ extremely low reading, particularly inside of _____ eye of _____ hurricane, where extremely low barometric pressure readings may be possible.
